**Control Stick Function**

The Nintendo® 64 Controller contains a Control Stick which uses an Analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding the L and R Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

**Starting The Game**

1. Turn OFF the POWER switch on your Nintendo 64 Control Deck. **WARNING:** Never try to insert or remove a Game Pak when the power is ON.
2. Make sure a Controller is plugged into Controller Socket 1 on the Control Deck.
3. If you’re playing against a friend, plug another Controller into Controller Socket 2.
4. Insert the Game Pak into the slot on the Control Deck. Press firmly to lock the Game Pak in place.
5. Turn ON the POWER switch. The MGM Interactive, EA GAMES™ and Eurocom Logo screens appear, followed by "The World Is Not Enough" Title screen. If you don’t see them, begin again at step 1.
6. At the "The World Is Not Enough" Title screen, press START to advance to the Main menu (► p. 4).

Introduction

Welcome back, 007. An MI-6 agent has been murdered and a classified report from the Russian Atomic Energy Department taken from his body. An old friend, Sir Robert King, accidentally purchased this stolen document, believing it to contain information about terrorists who attacked his pipeline in Kazakhstan. In the meantime, a Swiss banker named Lachaise, a middle-man in this affair, has offered to return Sir Robert's money. I want you to go to him, discover who killed our agent, and collect the money.

Expansion Pak Notes: "The World is Not Enough" supports the Expansion Pak. While all modes of gameplay are accessible without the Expansion Pak, players who choose to use the Expansion Pak will be treated to a more visually stunning game. With the Expansion Pak, Hi-Color mode is enabled.

Getting Started

Main Menu

Start a single or multiplayer game, load or save game data, or change game options from the Main menu.

To begin a new mission, select START GAME. The Mission Selection screen appears.

Note: Default settings in this manual appear in bold type.

MISSION SELECTION SCREEN

Choose a mission to undertake. You must complete the current mission to advance to the next mission.

After selecting a mission, the Difficulty menu appears.

DIFFICULTY MENU

Select the skill level at which you want to compete. The higher the skill level, the more objectives you need to complete in each mission. Do you have what it takes to survive as a 00 Agent?

AGENT
The easiest level and a great place for beginning agents to gain experience.

SECRET AGENT
A moderate challenge for veteran agents.

00 AGENT
The ultimate test for experienced agents. In this level, enemies are stronger, smarter, and more skillful.

Note: In 00 Agent mode, the Auto Aim feature is not available. You must rely totally on your skill to survive.

After selecting a skill level, the Mission Briefing screen appears.
MISSION BRIEFING SCREEN

This screen contains all pertinent information you will need to complete the upcoming mission. The more knowledge you have, the better equipped you will be to handle any unforeseen problems in the field.

Select to view Statistics from your mission.

If you successfully complete the mission, you may advance to the next mission. If you fail to complete your objectives, you must replay the mission. Good luck, 007.

**Bond's Weaponry**

In the course of your missions you'll encounter a number of powerful foes and experience many high-risk situations. To complete your assignments, you'll need to strategically use your weapons and gadgets.

**Weapons**

For these assignments, you'll be required to use a wide range of high-tech weaponry. Some situations require the use of force, while others demand silent anti-personnel tactics for stealth purposes. As you collect additional weapons along the way, choose the best one for a given situation. The following weapons are some of the most common you will find throughout your assignments.

**DEUTSCHE M45**

An updated version of the Deutsche M9. This heavy-caliber submachine gun sacrifices a bit in the rate of fire with a tradeoff of more stopping power.

- **Capacity:** 25 Rounds
- **Damage:** Medium
- **Range:** Medium
- **Ammunition:** .45 ACP

**FRINESI SPECIAL 12**

A shotgun with automatic-fire capabilities. The Frinesi is powerful, but lacks accuracy from long-range.

- **Capacity:** 8 Rounds
- **Damage:** High
- **Range:** Low
- **Ammunition:** 12 Gauge

**GL 40**

The GL 40 is a single-shot grenade launcher. The grenades will explode after a 5-second delay.

- **Capacity:** 1 Round
- **Damage:** Very High
- **Range:** High
- **Ammunition:** 40mm

**INGALLS TYPE 20**

The Ingalls Type 20 is a heavy machine pistol with a high rate of fire, complete with a silencer. It is a favorite amongst terrorists and urban criminals.

- **Capacity:** 30 Rounds
- **Damage:** Medium
- **Range:** Medium
- **Ammunition:** .45 ACP

**MEYER BULLPUP**

The Meyer Bullpup is a compact and highly accurate rifle. Its telescopic sight makes it a great weapon to use from a distance.

- **Capacity:** 30 Rounds
- **Damage:** High
- **Range:** High
- **Ammunition:** 5.6 mm

**MEYER TMP**

The Meyer TMP is a small machine pistol with a high rate of fire. Though its damage is low, it is very reliable from a distance.

- **Capacity:** 25 Rounds
- **Damage:** Low
- **Range:** Medium
- **Ammunition:** 9mm

**RAPTOR MAGNUM**

The Magnum is a large, powerful, semi-automatic pistol. Because of the heavy-caliber rounds, the Magnum holds less rounds than a standard firearm such as the P2K.

- **Capacity:** 8 Rounds
- **Damage:** High
- **Range:** Low
- **Ammunition:** .44 Mag

**SOVIET KA-57**

This heavy assault rifle is the standard issue weapon for the Russian military. It has excellent stopping power, but limited accuracy.

- **Capacity:** 30 Rounds
- **Damage:** High
- **Range:** High
- **Ammunition:** 7.62 mm
**SUISSE SSR 4000**  
Designed for covert missions, this is a superbly accurate sniper rifle with silencer and telescopic sight. However, the bolt action makes it slow to fire and reload.  
- **Capacity:** 5 Rounds  
- **Damage:** High  
- **Range:** Very High  
- **Ammunition:** 7.62mm

**WATCH DART**  
Designed to look like a normal wristwatch, this is actually a concealed dart gun. It is intended for covert infiltration missions, and fires small tranquilizer darts capable of dropping your target on the spot. Intended for situations when non-lethal force must be used, this will be issued to you at the start of appropriate missions.

**WATCH STUNNER**  
Also contained in your wristwatch is a low-powered electric cable weapon. When it hits a person, the Stunner's current interferes with the body's own natural electrical field. The target is immobilized by muscle contractions, but no permanent damage is suffered. It will incapacitate a target as long as the beam is held on them, and they will need a short time to recover afterwards. 

The Stunner uses an internal power supply, which is good for 100 shots. This power supply recharges automatically, at a rate of 2 shots for every 1 second without use.

**WOLFRAM P2K**  
The P2K is your standard issue firearm. It is lightweight, efficient, and sometimes comes equipped with a silencer.  
- **Capacity:** 16 Rounds  
- **Damage:** Low  
- **Range:** Low  
- **Ammunition:** 9mm

**Gadgets**

As part of MI-6's Q Division, you have access to some of the most technologically advanced field equipment available. 

**To use a gadget:**
1. Press **START** to pause the game. The Pause menu appears.  
2. On the Pause menu, select **GADGETS**. The Gadgets menu appears.  
3. Control Pad to highlight a gadget, then press the **A** Button to equip the gadget. The gameplay screen appears.  
4. Press the **Z** Button to use the gadget.  
   - To quickly select a gadget, hold the **A** Button, then press the **B** Button to cycle through available gadgets.

**BODY ARMOR**  
An anti-fragmentation vest composed of 10-layer kevlar weave, with ceramic inserts. Body Armor protects against any small-arms rounds or blunt trauma. After acquiring Body Armor, a blue Armor Meter appears under the Health Meter. Each time you sustain injury, the Armor Meter depletes instead of the Health Meter. Once the Armor Meter is depleted, any further injury is applied to your Health Meter. 

*Note: Once collected, the Body Armor is immediately equipped. Other gadgets can be used with Body Armor equipped.*

**BOMB DISPOSAL KIT**  
Consisting of wire-cutters, probes, and other tools, this handy kit allows you to defuse explosive devices.

**To use the Bomb Disposal Kit:**
1. Select the Bomb Disposal Kit from your Gadget menu.  
2. Aim the kit at the explosive device, then repeatedly press or hold the **Z** Button until the bomb is defused. You can measure your progress on the blue gauge. Watch out for the red gauge, which is the anti-tampering device: If this reaches 100% then the bomb will go off.

**CAMERA**  
A miniature digital camera with conventional and low-light operating capability. Use the Camera to copy secret documents, take surveillance shots, or gather incriminating evidence. You're only as good as your information.
COVERT MODEM
A small computer device that can be attached to a target computer and used to relay data back to MI-6 Headquarters.

CUTTING LASER WATCH
Your wristwatch also possesses a powerful, short-range cutting laser. It can be used to sever wires or cables, or to burn the locks off doors.

DATA SCRAMBLER
A miniature electronic ‘bomb’ that when placed on a computer or electronic storage device, irreparably scrambles any data within.

FINGERPRINT SCANNER
A handy device used to copy an individual’s fingerprints in order to open high-security locks.

FLASH HANG GUN
A stun grenade disguised as a semi-automatic pistol, with the detonator hidden in a pair of glasses. These are used to disorient and subdue targets rather than do permanent damage.

GRAPPLE HOOK WATCH
A fashionable timepiece containing a miniature grappling hook with 50-foot high-tensile micro-filament, able to support up to 800 lbs.

KEYPAD DECRYPTOR
A computerized algorithm generator which is capable of decoding any encoded keypad lock system within seconds.

NIGHT VISION GLASSES
These glasses allow the wearer to see clearly in the darkest environments. They have a limited power supply, which automatically recharges when not in use.

PHONE TAP
A tiny transceiver device used for bugging telephones. Will broadcast any received conversations.

SAFE CRACKER
An electronic gadget that automatically ascertains the combination of any safe and unlocks it.

X-RAY GLASSES
These glasses allow the wearer to see through walls or doors, at close-range.

Mission Briefings

The World is Not Enough contains fourteen challenging missions. To complete a mission, you must successfully fulfill all of the mission objectives. The higher the skill level, the more objectives there are for you to complete.

Mission 1: Courier
An MI-6 agent has been killed, and a classified report from the Russian Atomic Energy Department was taken from his body. Sir Robert King mistakenly purchased this report believing it contained information about the terrorists who have attacked his new oil pipeline in Kazakhstan. You must see Lachaise, a Swiss banker and middleman in this affair, to ascertain the identity of the murderer, retrieve King’s money, and escape.

Mission 2: King’s Ransom
The money you retrieved from Spain is to be returned to Sir Robert King. King is an old friend of M’s, who helped him years ago when his daughter Elektra was kidnapped by the terrorist Renard. When a terrorist group launches an attack on MI-6 Headquarters, you must clear the building of enemies, while securing the safety of key MI-6 personnel.

Mission 3: Thames Chase
The Female Assassin who murdered Lachaise is behind the attack on MI-6. You must pursue her through the streets and capture her alive in order to find out who she is working for.

Mission 4: Underground Uprising
The Female Assassin has taken refuge in an underground train station, which has been over-run by her henchmen. You must free the hostages held inside, then locate and defuse a bomb, before continuing the pursuit.

Mission 5: Cold Reception
The terrorist Renard has returned, seeking revenge. With Sir Robert King dead, and the MI-6 Headquarters devastated, his next target is likely to be Elektra herself. You must find out who is working for Renard in Elektra’s organization and make sure that she comes to no harm.
Mission 6: Night Watch
The attack on Elektra has confirmed your fears about Renard. You suspect Elektra's head of security, Davidov, may be Renard's inside man. You must gather enough evidence to incriminate him. Use caution though. You must avoid detection and be careful not to harm any of Elektra's employees - they are innocent after all.

Mission 7: Midnight Departure
Davidov, under the guise of Dr. Arkov, is on his way to rendezvous with Renard. Track him through the forest and eliminate him, then take his place on the flight to Kazakhstan.

Mission 8: Masquerade
Renard's mercenaries, disguised as IDA personnel, have brought you to an old Soviet nuclear test facility in Kazakhstan. Posing as Dr. Arkov, you must penetrate the facility without arousing suspicion while you discover what is going on.

Missions 9/10: City of Walkways I & II
Renard has managed to steal a nuclear warhead. To get a lead on where he might be hiding, you must visit a former adversary, Valentin Zukovsky. Though he now runs both a legitimate casino and a caviar fishery, if anyone knows what is going on in the black market, it will be Zukovsky.

Mission 11: Turncoat
Zukovsky has admitted that his nephew Nikolai is smuggling equipment to Elektra. The delivery is to be made to Istanbul. Zukovsky has a listening station in the city, and brings you and Christmas, a nuclear physicist, there to help find Elektra. However, before you can reach Nikolai, Bull, one of Zukovsky's men detonates a bomb that disables the station. You must track down Bull and stop him from warning Renard.

Mission 12: Fallen Angel
M is currently a hostage in a tower. You must make your way past Elektra's personnel and ensure M's safe release. Additionally, you must also stop Renard and Elektra from escaping in the submarine.

Mission 13: A Sinking Feeling
With Elektra out of the way, you can now focus on Renard. He has captured Christmas and set off in the submarine. Make your way aboard, and rescue Christmas.

Mission 14: Meltdown
It's now or never, Bond. Find Renard and stop him from detonating the submarine's nuclear reactor. If he is successful, the city will be destroyed and millions of innocent people will die.
